Trans. of Vestnik Elektromyashennosti (USSR)
1958 [v. 29] no. 6, p. 46-48. (Abstract available)

DESCRIPTORS: *Batteries and components, *Alkaline
cells, Manganese compounds, Oxides.

The volt-ampere characteristics of manganese-nickel
oxide electrodes are described. Results are given
showing the effects of charging current density, elec-
trolyte concentration, discharge current density,
temperature and electrolyte composition. It is shown
that the addition of nickel oxide sharply improves the
working of the manganese oxide electrode and that such
addition is of practical interest. (Author)

no. 6, Seriya Geologii i Geografii, no. 1, p. 139-143.

DESCRIPTORS: *Ocean currents, Turbulence, Heat
transfer, Earth, Climate.

The possibility of changing the climate of the earth by
the artificial redistribution of insolation heat among
the different areas of the globe is considered. Two
phenomena associated with coastal currents are ana-
lyzed: (1) the process of turbulent exchange in the
coastal zone, and (2) the appearance of countercurrents
near the coasts of straits.
